Through song and play, Education Through Music (ETM) provides a gateway for understanding how learning, motivation and cognitive development proceeds. ETM strengthens childrens' focus and attentiveness while reducing distractibility and impulsivity. This enhances memory, language structures and auditory processing. ETM stabilizes the emotional system and promotes self-monitoring, cultivating social-emotional and interactive skills with strong regard for self and others. ETM enables children to think, invent, respond and communicate effectively. ETM aids teachers in creating a classroom of eager, alert and motivated learners. Presented by George Dozet.

Light snacks provided.
